

Fast, Reliable, Scalable: Fiber-based Internet Access for Your Business

WHY FIBER?

- IFN provides the most reliable and cost-effective Ethernet dedicated Internet connectivity
- We support businesses in big cities, rural areas and across the country, making us the preferred Internet provider for Indiana businesses
- Our fiber-based Ethernet network makes it simple to integrate with your existing LAN infrastructure and our scalable bandwidth gives you the flexibility to choose the right speeds to drive your business initiatives

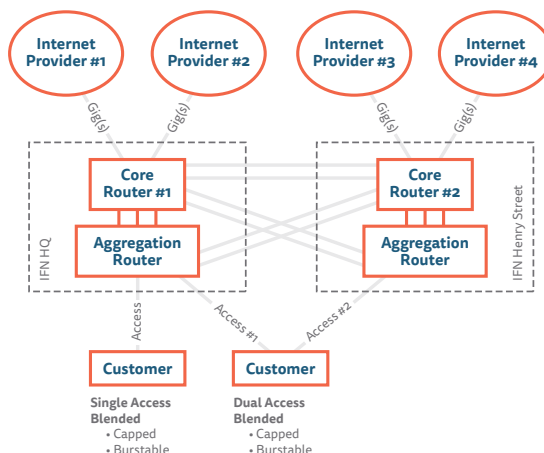

SURVIVABLE NETWORK DESIGN

Remaining competitive in today's business environment requires fast, reliable Internet access. IFN's fully redundant, geographically diverse Internet solution provides this reliability at a competitive price. Our Internet services include duplicate Aggregation and Core Routers, internal path diversity and multiple carrier-grade Internet service providers. Multiple paths from your premise to our Internet platform are also available.

IFN INTERNET SERVICES INCLUDE:

- Expansive internet access options, from 5Mbps to 100Gbps+
- Multiple 10g upstream providers, geographically diverse with complete core router redundancy
- Diverse transport paths from your location to our Internet gateway to ensure speed and reliability
